Notes to the Financial Statements

(In Thousands)

NOTE 1. Summary of Significant Accounting Policies

A Reporting Entity

The Department of Commerce (the Department) is a cabinet level agency of the Executive Branch of the U.S. Government. Established in 1903 to promote U.S. business and trade, the Department's broad range of responsibilities includes predicting the weather, granting patents and registering trademarks, measuring economic growth, gathering and disseminating statistical data, expanding U.S. exports, developing innovative technologies, helping local communities improve their economic development capabilities, promoting minority entrepreneurial activities, and monitoring the stewardship of national assets. The Department is composed of thirteen bureaus, the Emergency Oil and Gas and Steel Loan Guarantee Programs, and Departmental Management entities. The United States Travel and Tourism Administration was abolished during FY 1996, and in August 2002, Public Law 107-206 rescinded any remaining appropriated balance for that activity.

For the *Consolidating Statements of Net Cost* some of the Department's entities have been grouped together, based on their organizational structures, as follows:

- National Oceanic and Atmospheric Administration (NOAA)
- U.S. Patent and Trademark Office (USPTO)
- Economics and Statistics Administration (ESA)
 - Bureau of Economic Analysis (BEA)
 - Bureau of the Census (Census)
- Technology Administration (TA)
 - National Institute of Standards and Technology (NIST)
 - National Technical Information Service (NTIS)
- Other Bureaus
 - Bureau of Industry and Security (BIS) (formerly Bureau of Export Administration)
 - Economic Development Administration (EDA)
 - International Trade Administration (ITA)
 - Minority Business Development Agency (MBDA)
 - National Telecommunications and Information Administration (NTIA)

- Departmental Management (DM)
 - Emergency Oil and Gas and Steel Loan Guarantee Programs (ELGP)
 - Franchise Fund (FF)
 - Gifts and Bequests (G&B)
 - Office of the Inspector General (OIG)
 - Salaries and Expenses (S&E)
 - Working Capital Fund (WCF)

B *Basis of Accounting and Presentation*

The Department's fiscal year ends September 30. These financial statements reflect both accrual and budgetary accounting transactions. Under the accrual method of accounting, revenues are recognized when earned and expenses are recognized when incurred, without regard to the receipt or payment of cash. Budgetary accounting is designed to recognize the obligation of funds according to legal requirements, which, in many cases, is made prior to the occurrence of an accrual-based transaction. Budgetary accounting is essential for compliance with legal constraints and controls over the use of Federal funds.

These financial statements have been prepared from the accounting records of the Department in conformance with accounting principles generally accepted in the U. S. (GAAP) and the form and content for entity financial statements specified by OMB in Bulletin 01-09, *Form and Content of Agency Financial Statements*. The GAAP for Federal entities are the standards prescribed by the Federal Accounting Standards Advisory Board (FASAB), which is the official body for setting the accounting standards of the Federal Government.

Throughout these financial statements, intragovernmental assets, liabilities, earned revenues, and costs have been classified according to the type of entity with which the transactions are associated. Intragovernmental assets and liabilities are those from or to other Federal entities. Intragovernmental earned revenues are collections or accruals of revenue from other Federal entities, and intragovernmental costs are payments or accruals to other Federal entities.

C *Elimination of Intra-Entity and Intra-Departmental Transactions and Balances*

Transactions and balances within a reporting entity (intra-entity) have been eliminated from the financial statements. Transactions and balances among the Department's entities (intra-Departmental) have been eliminated from the *Consolidated Balance Sheets* and the *Consolidated Statements of Net Cost*. There are no intra-Departmental eliminations for the *Consolidated Statements of Changes in Net Position* and the *Consolidated Statements of Financing*. The *Statement of Budgetary Resources* is presented on a combined basis; therefore intra-Departmental and intra-entity transactions and balances have not been eliminated from this statement.

D *Assets*

Non-Entity Assets are those held by the Department, but are not available for use in its operations. These assets are disclosed in Note 9.

E *Fund Balance with Treasury*

Fund Balance with Treasury is the aggregate amount of funds in the Department's accounts with the U.S. Department of the Treasury (Treasury). Deposit Funds represent the amounts held in customer deposit accounts.

Treasury processes cash receipts and disbursements for the Department's domestic operations. Cash receipts and disbursements for the Department's overseas operations are primarily processed by the U.S. Department of State's financial service centers.

F *Accounts Receivable, Net*

Accounts Receivable are recognized primarily when the Department performs reimbursable services or sells goods. Accounts Receivable are reduced to net realizable value by an Allowance for Uncollectible Accounts. This allowance is estimated periodically using methods such as the identification of specific delinquent receivables, and the analysis of aging schedules and historical trends adjusted for current market conditions.

G *Investments in Treasury Securities, Net*

Investments in Treasury Securities are reported at their acquisition cost, less the accumulated amortization of discounts. At September 30, 2003, investments consisted of one-year special issue Treasury Bills with interest rates averaging ___ percent. Discounts are amortized into interest income over the life of the Treasury Security using the straight-line method, which approximates the effective yield method.

H *Advances and Prepayments*

Advances are payments the Department has made to cover a part or all of a grant recipient's anticipated expenses or as advance payments for the cost of goods and services to be acquired. For grant awards, the grant recipient is required to periodically (monthly or quarterly) report the amount of cost incurred. Prepayments are payments the Department has made to cover certain periodic expenses before those expenses are incurred, such as subscriptions and rent.

I *Loans Receivable and Related Foreclosed Property, Net*

A direct loan is recorded as a receivable after the Department disburses funds to a borrower. The Department also makes loan guarantees with respect to the payment of all or part of the principal or interest on debt obligations of non-Federal borrowers to non-Federal lenders. A borrower-defaulted loan guaranteed by the Department is recorded as a receivable from the borrower after the Department disburses funds to the lender.

Foreclosed Property is acquired primarily through foreclosure and voluntary conveyance, and is recorded at the fair market value at the time of acquisition.

Interest Receivable represents interest income earned on scheduled Loans Receivable and/or for the first 180 days outstanding on past-due loans. Interest Receivable pertaining to days in excess of 180 days outstanding on past-due loans that are determined to be uncollectible are not recorded in the Department's financial statements.

Direct Loans and Loan Guarantees Obligated before October 1, 1991 (pre-FY 1992): Loans Receivable are reduced by an Allowance for Loan Losses, which is based on an analysis of each loan's outstanding balance. The value of each receivable, net of any Allowance for Loan Losses, is supported by the values of pledged collateral and other assets available for liquidation, and by the Department's analysis of financial information of parties against whom the Department has recourse for the collection of these receivables.

The Economic Development Revolving Fund is required to make annual interest payments to Treasury after each fiscal year-end based on its outstanding receivables at September 30.

Direct Loans and Loan Guarantees Obligated after September 30, 1991 (post-FY 1991): Post-FY 1991 obligated direct loans and loan guarantees and the resulting receivables are governed by the Federal Credit Reform Act of 1990.

For direct or guaranteed loans disbursed during a fiscal year, a subsidy cost is initially recognized. Subsidy costs are intended to estimate the long-term cost to the U.S. Government of its loan programs. The subsidy cost equals the present value of estimated cash outflows over the lives of the loans, minus the present value of estimated cash inflows, discounted at the applicable Treasury interest rate. Administrative costs such as salaries and legal fees are not included in the subsidy costs. Subsidy costs can arise from interest rate differentials, interest subsidies, delinquencies and defaults, loan origination and other fees, and other cash flows. The Department calculates its subsidy costs based on a model created and provided by OMB.

Loans Receivable are recorded at the present value of the estimated cash inflows less cash outflows. The difference between the outstanding principal of the loans and the present value of their net cash inflows is recorded as the Allowance for Subsidy Cost. The Allowance for Subsidy Cost is re-estimated annually, as of September 30.

J *Notes Receivable*

Notes Receivable, included in Other Assets, arise through the sale of foreclosed property to non-Federal parties. The property is used as collateral and an Allowance for Uncollectible Amounts is established if the collateral is not adequate. An analysis of the collectibility of receivables is performed periodically. Any gains realized through the sale of foreclosed property are initially deferred and recognized in proportion to the percentage of principal repaid.

K *Inventory, Materials, and Supplies, Net*

Inventory, Materials, and Supplies are stated at the lower of cost or net realizable value primarily under the weighted average and first-in, first-out methods, and are adjusted for the results of periodic physical inventories. Inventory, Materials, and Supplies are expensed when consumed. There are no restrictions on their sale, use, or disposition.

L *General Property, Plant, and Equipment, Net*

General Property, Plant, and Equipment (PP&E) is comprised of capital assets used in providing goods or services. PP&E is stated at full cost, including all costs related to acquisition, delivery, and installation, less accumulated depreciation. PP&E also includes assets acquired through capital leases, which are initially recorded at the amount recognized as a liability for the capital lease at its inception.

Capitalization Thresholds: The Department's general policy is to capitalize PP&E if the initial acquisition price is \$25 or more and the useful life is two years or more. NOAA is an exception to this policy, having a capitalization threshold of \$200. PP&E with an acquisition cost less than the capitalization threshold is expensed when purchased. When the purchase of a large quantity of items, each costing less than the capitalization threshold, would materially distort the amount of costs reported in a given period, the purchase is capitalized as a group.

Depreciation: Depreciation is expensed on a straight-line basis over the estimated useful life of the asset with the exception of leasehold improvements, which is depreciated over the remaining life of the lease or over the useful life of the improvements, whichever is shorter. Land and construction-in-progress are not depreciated.

Real Property: The General Services Administration (GSA) provides most of the facilities in which the Department operates, and charges rent based on comparable commercial rental rates. Accordingly, GSA-owned properties are not included in the Department's PP&E. The Department's real property consists primarily of facilities for NIST and NOAA.

Construction-in-Progress: Costs for the construction, modification, or modernization of PP&E are initially recorded as construction-in-progress. Upon completion of the work, the costs are transferred to the appropriate PP&E account for capitalization.

M *Liabilities*

A liability for Federal accounting purposes is a probable and measurable future outflow or other sacrifice of resources as a result of past transactions or events. Intragovernmental liabilities arise from transactions with other Federal entities.

Accounts Payable: Accounts Payable are amounts owed for goods and services received, progress on contract performance by others, and other expenses due.

Debt to Treasury: The Department has borrowed funds from Treasury for its Fisheries Finance and Individual Fishing Quota (IFQ) Direct Loans, Fishing Vessel Obligation Guarantee (FVOG) Program, Bering Sea Pollock Fishery Buyout, and the Emergency Steel Loan Guarantee Program (ELGP-Steel). To simplify interest calculations, all borrowings are dated October 1. Interest rates are based on a weighted average of rates during the term of the borrowed funds. The weighted average rate for each cohort's borrowing is recalculated at the end of each fiscal year during which disbursements are made. Annual interest payments on unpaid principal balances as of September 30 are required. Principal repayments are required only at maturity, but are permitted at any time during the term of the loan. The Department's primary financing source for repayments of Debt to Treasury is the collection of principal on the associated Loans Receivable. Balances of any borrowed but undisbursed funds will earn interest at the same rate used in calculating interest expense.

Resources Payable to Treasury: Resources Payable to Treasury includes Liquidating Fund assets in excess of liabilities that are being held as working capital for the following loan programs: the FVOG Program and the Fisheries Finance Direct Loans. These liabilities are required to be paid only when the loan programs fully complete their activities and terminate their operations. However, NOAA, at the request of OMB, pays the unobligated balance annually. EDA's Drought Loan Portfolio is a non-entity asset; therefore, the amount of the Portfolio is also recorded as a liability to Treasury. The Portfolio collections are returned to Treasury monthly and the liability is reduced accordingly.

Unearned Revenue: Unearned Revenue is the portion of monies received for which goods and services have not yet been provided or rendered by the Department. Revenue is recognized as reimbursable costs are incurred, and the Unearned Revenue balance is reduced accordingly. Unearned Revenue also includes the balances of customer deposit accounts held by the Department. The intragovernmental Unearned Revenue relates to amounts collected in advance under reimbursable agreements. The majority of the Unearned Revenue with the public represents patent and trademark application and user fees that are pending action.

Accrued Payroll and Annual Leave; Accrued Benefits: These categories include salaries, wages, and benefits earned by employees, but not disbursed as of September 30. Annually, as of September 30, the balances of Accrued Annual Leave are adjusted to reflect current pay rates. Sick leave and other types of non-vested leave are expensed as taken. Accrued Benefits are included in Intragovernmental Other Liabilities.

Accrued FECA Liability: The Federal Employees Compensation Act (FECA) provides income and medical cost protection to covered Federal civilian employees injured on the job, to employees who have incurred work-related occupational diseases, and to beneficiaries of employees whose deaths are attributable to job-related injuries or occupational diseases. The FECA program is administered by the U.S. Department of Labor (Labor), which pays valid claims against the Department and subsequently seeks reimbursement from the Department for these paid claims. Accrued FECA Liability, included in Intragovernmental Other Liabilities, represents amounts due to Labor for claims paid on behalf of the Department.

NOAA Corps Employee Retirement Benefits: These liabilities are recorded at the actuarial present value of projected benefits, calculated annually as of September 30. The actuarial cost method used to determine these liabilities is the aggregate entry age normal method. Under this method, the actuarial present value of projected benefits is allocated on a level basis over the earnings or the service of the group between entry age and assumed exit ages. The portion of this actuarial present value allocated to the valuation year is called the normal cost. Actuarial gains and losses, and prior and past service cost, if any, are recognized immediately in the year they occur, without amortization. The actuarial calculations use U.S. Department of Defense Retirement Board economic assumptions (as used by the U.S. Military Retirement System) for investment earnings on Federal securities, annual basic pay increases, and annual inflation. Demographic assumptions appropriate to covered personnel are also used. For background information about these plans, see Note 1.Q, *Employee Retirement Benefits*.

Actuarial FECA Liability: Actuarial FECA Liability represents the liability for future workers' compensation (FWC) benefits, which includes the expected liability for death, disability, medical, and miscellaneous costs for approved cases. The liability is determined by Labor annually as of September 30, using a method that utilizes historical benefits payment patterns related to a specific incurred period to predict the ultimate payments related to that period. The projected annual benefit payments are discounted to present value using OMB's economic assumptions for ten-year Treasury notes and bonds. To provide more specifically for the effects of inflation on the liability for FWC benefits, wage inflation factors (Cost of Living Allowance) and medical inflation factors (Consumer Price Index - Medical) are applied to the calculation of projected future benefits. These factors are also used to adjust historical payments of benefits by the Department to current-year constant dollars.

The model's resulting projections are analyzed by Labor to ensure that the amounts are reliable. The analysis is based on two tests: (1) a comparison of the percentage change in the liability amount by agency to the percentage change in the actual payments, and (2) a comparison of the ratio of the estimated liability to the actual payment of the beginning year calculated for the current projection to the liability-payment ratio calculated for the prior projection.

Accrued Grants: The Department administers a diverse array of financial assistance programs and projects concerned with the entire spectrum of business and economic development efforts that promote activities such as: expanding U.S. exports, creating jobs, contributing to economic growth, developing innovative technologies, promoting minority entrepreneurship, protecting coastal oceans, providing weather services, managing worldwide environmental data, and using telecommunications

and information technologies to better provide public services. Disbursements of funds under the Department's grant programs are generally made when requested by grantees. These draw-down requests may be received and fulfilled before grantees make the Department's program expenditures. When the Department has disbursed funds but grant recipients do not yet report expenditures, these disbursements are recorded as advances. However, if a recipient reports program expenditures that have not been advanced by the Department as of the end of the federal fiscal year, such amounts are recorded as grants payable and grant expenses in that fiscal year.

Environmental and Disposal Liabilities: NIST operates a nuclear reactor licensed by the U.S. Nuclear Regulatory Commission, in accordance with NIST's mission of setting standards and examining new technologies. The Department currently estimates the cost of decommissioning this facility to be \$_____. The environmental liability is being accrued on a straight-line basis over the expected life of the facility. Under current legislation, funds to cover the expense of decommissioning the facility's nuclear reactor should be requested in a separate appropriation when the decommissioning date becomes relatively certain.

The Department has incurred cleanup costs related to the costs of removing, containing, and/or disposing of hazardous waste from facilities used by NOAA. The Department has estimated its liability for environmental cleanup costs at all NOAA-used facilities, including decommissioning of ships. The largest of NOAA's environmental liabilities, amounting to \$__ million at September 30, 2003, relates to clean-up of the Pribiloff Island in Alaska, which contains waste from the Department of Defense's use during World War II. However, it does not recognize a liability for environmental cleanup costs for NOAA-used facilities that are less than \$25 per project. Where an estimate of cleanup costs includes a range of possible costs, the most likely cost is reported. Where no cost is more likely than another, the lowest estimated cost in the range is reported. The liability is reduced as progress payments are made.

Capital Lease Liabilities: Capital Leases are leases for PP&E that transfer substantially all the benefits and risks of ownership to the Department.

ITA Foreign Service Nationals' Voluntary Separation Pay: This liability, included in Other Liabilities, is based on the salaries and benefit statuses of employees in countries where governing laws require a provision for separation pay.

Liabilities Not Covered by Budgetary Resources: These are liabilities for which Congressional actions are needed before budgetary resources can be provided. The Department anticipates that liabilities not covered by budgetary resources will be funded from future budgetary resources when required. These amounts are detailed in Note 15.

Under accrual accounting, the expense for annual leave is recognized when the leave is earned. However, for most of the Department's fund accounts, appropriations are provided to pay for the leave when it is taken. As a result, budgetary resources do not cover a large portion of Accrued Annual Leave.

The Department generally receives budgetary resources for the Actuarial FECA Liability and NOAA Corps Employee Retirement Benefits Liabilities when they are needed for disbursements.

Contingent Liabilities: A contingency is an existing condition, situation, or set of circumstances involving uncertainty as to possible gain or loss. The uncertainty will ultimately be resolved when one or more future events occur or fail to occur. A contingent liability is recognized when a past event or exchange transaction has occurred, and a future outflow or other sacrifice of resources is measurable and probable. A contingency is not disclosed in the Notes to the Financial Statements when any of the conditions for liability recognition are not met and when the chance of the future event or events occurring is remote. A contingency is disclosed in the Notes to the Financial Statements when any of the conditions for liability recognition are not met and the chance of the future confirming event or events occurring is more than remote but less than probable.

N *Commitments*

Commitments are preliminary actions that will ultimately result in an obligation to the Federal Government if carried through, such as purchase requisitions, estimated travel orders, or unsigned contracts/grants. Major long-term commitments are disclosed in Note 16.

O *Net Position*

Net Position is the residual difference between assets and liabilities and is comprised of Unexpended Appropriations and Cumulative Results of Operations.

Appropriations are recognized as capital when made available for apportionment by OMB. Unexpended Appropriations represent the total amount of unexpended budget authority, both obligated and unobligated. Unexpended Appropriations are reduced for Appropriations Used and adjusted for other changes in budgetary resources, such as transfers and rescissions. Cumulative Results of Operations is the net result of the Department's operations since inception.

P *Revenues and Other Financing Sources*

Appropriations Used: Most of the Department's operating funds are provided by congressional appropriations of budget authority. The Department receives appropriations on annual, multiple-year, and no-year bases. Upon expiration of an annual or multiple-year appropriation, the obligated and unobligated balances retain their fiscal year identity, and are maintained separately within an expired account. The unobligated balance can be used to make legitimate obligation adjustments, but is otherwise not available for expenditures. Annual and multiple-year appropriations are canceled at the end of the fifth year after expiration. No-year appropriations do not expire. Appropriations of budget authority are recognized as used when goods and services are received or benefits and grants are provided.

Exchange and Non-Exchange Revenue: The Department classifies revenues as either exchange revenue or non-exchange revenue. Exchange revenues are those that are derived from transactions in which both the government and the other party receive value, including processing patents and registering trademarks; sale of weather data, nautical charts, and navigation information; and other sales of goods and services. These revenues are presented on the Department's *Consolidated Statements of Net Cost* and serve to reduce the reported cost of operations borne by the taxpayer. Non-exchange revenues are derived from the government's sovereign right to demand payment, including fines for violations of fisheries and marine protection laws. Non-exchange revenues are recognized when a specifically identifiable, legally enforceable claim to resources arises, and to the extent that collection is probable and the amount is reasonably estimable. These revenues are not considered to reduce the cost of the Department's operations and are, therefore, reported on the *Consolidated Statements of Changes in Net Position*.

In certain cases, law or regulation sets the prices charged by the Department and, for program and other reasons, the Department may not receive full cost (e.g., the processing of patents and registering of trademarks, and the sale of weather data, nautical charts and navigation information). Prices set for products and services offered through the Department's working capital funds are intended to recover the full costs incurred by these activities.

Imputed Financing Sources From Costs Absorbed by Others (and Related Imputed Costs): In certain cases, operating costs of the Department are paid for by funds appropriated to other Federal entities. For example, pension benefits for most Department employees are paid for by the U.S. Office of Personnel Management (OPM) and certain legal judgments against the Department are paid from the Judgment Fund maintained by Treasury. OMB limits Imputed Costs to be recognized by Federal entities to the following: (1) employees' pension benefits; (2) health insurance, life insurance, and other benefits for retired employees; (3) other post-employment benefits for retired, terminated, and inactive employees, including severance payments, training and counseling, continued health care, and unemployment and workers' compensation under FECA; and (4) losses in litigation proceedings. The Department includes applicable Imputed Costs on the *Consolidated Statements of Net Cost*. In addition, an Imputed Financing Source is recognized on the *Consolidated Statements of Changes in Net Position*.

Transfers - In (Out): Intragovernmental transfers of budget authority (i.e., appropriated funds) or of assets without reimbursement are recorded at book value.

Q Employee Retirement Benefits

Civil Service Retirement System (CSRS) and Federal Employees Retirement System (FERS): Most employees of the Department participate in either the CSRS or FERS defined-benefit pension plans. FERS went into effect on January 1, 1987. FERS and Social Security automatically cover most employees hired after December 31, 1983. Employees hired prior to January 1, 1984 could elect to either join FERS and Social Security, or remain in CSRS.

The Department is not responsible for and does not report CSRS or FERS assets, accumulated plan benefits, or liabilities applicable to its employees. OPM, which administers the plans, is responsible for and reports these amounts.

For CSRS-covered employees, the Department was required in FY 2003 to make contributions to the plan equal to 8.51 percent of the employee's basic pay. Employees contributed 7 percent of basic pay. For each fiscal year, OPM calculates the U.S. Government's service cost for covered employees, which is an estimate of the amount of funds that, if accumulated annually and invested over an employee's career, would be enough to pay that employee's future benefits. Since the U.S. Government's estimated service cost exceeds contributions made by employer agencies and covered employees, this plan is not fully funded by the Department and its employees. The Department has recognized an Imputed Cost and Imputed Financing Source for the difference between the estimated service cost and the contributions made by the Department and its covered employees.

FERS contributions made by employer agencies and covered employees exceed the U.S. Government's estimated service cost. For FERS-covered employees, the Department was required in FY 2003 to make contributions of 10.7 percent of basic pay. Employees contributed 0.8 percent of basic pay. Employees participating in FERS are covered under the Federal Insurance Contributions Act (FICA), for which the Department contributes a matching amount to the Social Security Administration.

NOAA Corps Retirement System: Active-duty officers of the NOAA Corps are covered by the NOAA Corps Retirement System, an unfunded, pay-as-you-go, defined-benefit plan administered by the Department. Participants do not contribute to this plan. Plan benefits are based primarily on years of service and compensation. Participants as of September 30, 2003, included ___ active duty officers, ___ nondisability retiree annuitants, ___ disability retiree annuitants, and ___ surviving families. Key provisions include voluntary nondisability retirement after 20 years of active service, disability retirement, optional survivor benefits, Consumer Price Index (CPI) optional survivor benefits, and CPI adjustments for benefits.

Foreign Service Retirement and Disability System, and the Foreign Service Pension System: Foreign Commercial Officers are covered by the Foreign Service Retirement and Disability System, and the Foreign Service Pension System. The ITA makes contributions to the systems based on a percentage of an employee's pay. Both systems are multi-employer plans administered by the Department of State. The Department is not responsible for and does not report plan assets, accumulated plan benefits, or liabilities applicable to its employees. The Department of State, which administers the plan, is responsible for and reports these amounts.

Thrift Savings Plan (TSP): Employees covered by CSRS and FERS are eligible to contribute to the U.S. Government's TSP, administered by the Federal Retirement Thrift Investment Board. A TSP account is automatically established for FERS-covered employees, and the Department makes a mandatory contribution of one percent of basic pay. FERS-covered employees are entitled to contribute up to 13 percent of basic pay to their TSP account, with the Department making matching contributions up to four percent of basic pay. Employees covered by CSRS are entitled to contribute up to eight percent of basic pay to their TSP account. The Department makes no matching contributions for CSRS-covered employees.

Federal Employees Health Benefit (FEHB) Program: Most Department employees are enrolled in the FEHB Program, which provides post-retirement health benefits. OPM administers this program and is responsible for the reporting of liabilities. Employer agencies and covered employees are not required to make any contributions for post-retirement health benefits. OPM calculates the U.S. Government's service cost for covered employees each fiscal year. The Department has recognized the entire service cost of these post-retirement benefits for covered employees as an Imputed Cost and Imputed Financing Source.

NOAA Corps Health Benefits: Active-duty officers of the NOAA Corps are covered by the health benefits program for the NOAA Corps, which provides post-retirement health benefits. This is an unfunded, pay-as-you-go plan administered by the Department. Participants do not make any contributions to this plan.

Federal Employees Group Life Insurance (FEGLI) Program: Most Department employees are entitled to participate in the FEGLI Program. Participating employees can obtain basic term life insurance, with the employee paying two-thirds of the cost and the Department paying one-third. Additional coverage is optional, to be paid fully by the employee. The basic life coverage may be continued into retirement if certain requirements are met. OPM administers this program and is responsible for the reporting of liabilities. For each fiscal year, OPM calculates the U.S. Government's service cost for the post-retirement portion of basic life coverage. Because the Department's contributions to the basic life coverage are fully allocated by OPM to the pre-retirement portion of coverage, the Department has recognized the entire service cost of the post-retirement portion of basic life coverage as an Imputed Cost and Imputed Financing Source.

R *Use of Estimates*

The preparation of financial statements requires the Department to make estimates and assumptions that affect these financial statements. Actual results may differ from those estimates.

S *Tax Status*

The Department is not subject to federal, state, or local income taxes. Accordingly, no provision for income taxes is recorded.

NOTE 2. Fund Balance with Treasury

Fund Balance with Treasury, by type, is as follows:

	FY 2003	FY 2002
General Funds	\$	\$ 5,577,135
Revolving Funds		388,287
Special Fund (Patent and Trademark Surcharge Fund)		233,529
Other Special Funds		38,097
Deposit Funds		68,896
Trust Funds		3,049
Other Fund Types		4,891
Total	<u>\$</u>	<u>\$ 6,313,884</u>

Status of Fund Balance with Treasury is as follows:

	FY 2003	FY 2002
Unobligated Balance:		
Available	\$	\$ 1,463,199
Unavailable		389,308
Obligated Balance not yet Disbursed		4,461,377
Total	<u>\$</u>	<u>\$ 6,313,884</u>

The Department's Deposit Funds are not available to finance operating activities. See Note 19, *Combined Statements of Budgetary Resources*, for legal arrangements affecting the Department's use of Fund Balance with Treasury for FY 2003.

NOTE 3. Accounts Receivable, Net

	FY 2003		
	Accounts Receivable, Gross	Allowance for Uncollectible Accounts	Accounts Receivable, Net
Intragovernmental	<u>\$</u>		<u>\$</u>
With the Public	<u>\$</u>	<u>\$</u>	<u>\$</u>
	FY 2002		
	Accounts Receivable, Gross	Allowance for Uncollectible Accounts	Accounts Receivable, Net
Intragovernmental	<u>\$ 54,487</u>		<u>\$ 54,487</u>
With the Public	<u>\$ 63,557</u>	<u>\$ (7,959)</u>	<u>\$ 55,598</u>

NOTE 4. Cash

	FY 2003	FY 2002
Cash Not Yet Deposited to Treasury	\$	\$ 9,367
Imprest Funds		422
Other Cash		713
Total	\$	\$ 10,502

Cash not yet Deposited to Treasury represents patent and trademark fees that were not processed as of September 30, due to the lag time between receipt and initial review. Certain bureaus maintain imprest funds for operational necessity, such as law enforcement activities and environments that do not permit the use of electronic payments. Other Cash represents monies obtained through the foreclosure of a direct loan held in a trust account.

NOTE 5. Loans Receivable and Related Foreclosed Property, Net

The Department operates the following direct loan and loan guarantee programs:

Direct Loans:

NOAA	Fisheries Finance Direct Loans
NOAA	Coastal Energy Impact Program (CEIP)
NOAA	Fisheries Loan Fund
NOAA	Fisheries Finance Individual Fishing Quota (IFQ) Loans
NOAA	Bering Sea Pollock Fishery Buyout
NOAA	Community Development Loans
NOAA	Crab Buyback Loan
NOAA	Groundfish Buyback Loan
EDA	Economic Development Revolving Fund
EDA	Drought Loan Portfolio

Loan Guarantee Programs:

NOAA	Fishing Vessel Obligation Guarantee Program (FVOG Program)
EDA	Economic Development Revolving Fund
ELGP-Oil/Gas	Emergency Oil and Gas Loan Guarantee Program
ELGP-Steel	Emergency Steel Loan Guarantee Program

The net assets for the Department's loan programs consist of:

	FY 2003	FY 2002
Direct Loans Obligated Prior to FY 1992	\$	\$ 75,767
Direct Loans Obligated After FY 1991		159,872
Defaulted Guaranteed Loans from Pre-FY 1992 Guarantees		8,551
Defaulted Guaranteed Loans from Post-FY 1991 Guarantees		47,923
Total	\$	\$ 292,113

Direct Loans Obligated Prior to FY 1992 consists of:

Direct Loan Program	FY 2003				
	Loans Receivable, Gross	Interest Receivable	Allowance for Loan Losses	Foreclosed Property	Value of Assets Related to Direct Loans
CEIP	\$	\$	\$	\$	\$
Fisheries Loan Fund

Land Improvements consist of a bulkhead that has a useful life of 30 years.

NOTE 8. Other Assets

	<u>FY 2003</u>	<u>FY 2002</u>
With the Public		
Notes Receivable	\$	\$ 7,258
Bibliographic Database		5,874
Other		46
Total		<u>13,178</u>

As of September 30, 2003 and 2002, there are ____ and eight Notes Receivable, respectively, with maturity dates ranging from _____ to _____. The balances include accrued interest. These Notes Receivable are considered _____ collectible as of September 30, 2003 and fully collectible as of September 30, 2002. The bibliographic database relates to NTIS' scientific and technical information used to prepare products and services for sale. The database is stated at capitalized costs of \$_____ and \$41,315, less accumulated amortization of \$_____ and \$35,441, for September 30, 2003, and 2002, respectively.

NOTE 9. Non-Entity Assets

The assets that are not available for use in the Department's operations are summarized below:

	<u>FY 2003</u>	<u>FY 2002</u>
Intragovernmental:		
Fund Balance with Treasury	\$	\$ 92,474
Total Intragovernmental		92,474
With the Public:		
Cash		376
Accounts Receivable, Net		761
Loans Receivable and Related Foreclosed Property, Net- Drought Loan Portfolio		39,657
Total	\$	<u>\$ 133,268</u>

NOTE 10. Debt to Treasury

Loan Program	FY 2003		
	Beginning Balance	Net Borrowings (Repayments)	Ending Balance
Direct Loan Program			
Fisheries Finance, Financing Account	\$	\$	\$
Loan Guarantee Program			
FVOG Program			
Emergency Steel Loan Guarantee Program			
Total	\$	\$	\$

Maturity dates range from _____ to _____ and interest rates range from ____% to ____%.

Loan Program	FY 2002		
	Beginning Balance	Net Borrowings (Repayments)	Ending Balance
Direct Loan Program			
Fisheries Finance, Financing Account	\$ 182,260	\$ (11,886)	\$ 170,374
Loan Guarantee Program			
FVOG Program	13,673	(733)	12,940
Emergency Steel Loan Guarantee Program	-	79,199	79,199
Total	\$ 195,933	\$ 66,580	\$ 262,513

Maturity dates range from September 2005 to September 2029 and interest rates range from 5.36% to 7.26%.

NOTE 11. Other Liabilities

	FY 2003			FY 2002
	Current Portion	Non-Current Portion	Total	Total
Intragovernmental				
Accrued FECA Liability	\$	\$	\$	\$ 36,727
Accrued Benefits				10,914
Custodial Activity				994
Other				7,841
Total	<u>\$</u>	<u>\$</u>	<u>\$</u>	<u>\$ 56,476</u>
With the Public				
ITA Foreign Service Nationals' Voluntary Separation Pay	\$	\$	\$	\$ 7,174
Liabilities for Loan Guarantees				22,346
Contingent Liabilities				2,000
Employment Related				2,166
Other				6,564
Total	<u>\$</u>	<u>\$</u>	<u>\$</u>	<u>\$ 40,250</u>

For FY 2003, the Current Portion represents liabilities expected to be paid by September 30, 2004, while the Non-Current portion represents liabilities expected to be paid after September 30, 2004.

NOTE 12. Actuarial FECA Liability and NOAA Corps Employee Retirement Benefits Liabilities

These liabilities consist of:

	FY 2003	FY 2002
Actuarial FECA Liability	\$	\$ 190,687
NOAA Corps Retirement System Liability		316,195
NOAA Corps Post-Retirement Health Benefits Liabilities		136,577
Total	\$	\$ 643,459

Actuarial FECA Liability:

For discounting projected annual future benefit payments to present value, the interest rate assumptions used by the U.S. Department of Labor are as follows:

	FY 2003	FY 2002
Year 1 and Thereafter	%	5.20%

The wage inflation factors (Cost of Living Allowance) and medical inflation factors (Consumer Price Index - Medical) applied to the calculation of projected future benefits, and also used to adjust the methodology's historical payments to current year constant dollars, are as follows:

FY 2003		
Fiscal Year	Cost-of-Living Allowance	Consumer Price Index - Medical
2004	%	%
2005	%	%
2006	%	%
2007 and Thereafter	%	%

FY 2002		
Fiscal Year	Cost-of-Living Allowance	Consumer Price Index - Medical
2003	1.80%	4.31%
2004	2.67%	4.01%
2005	2.40%	4.01%
2006 and Thereafter	2.40%	4.01%

NOAA Corps Retirement System Liability: This liability represents the unfunded actuarial present value of projected plan benefits. The actuarial calculations used the following U.S. Department of Defense Retirement Board economic assumptions:

	<u>FY 2003</u>	<u>FY 2002</u>
Investment Earnings on Federal Securities	%	6.25%
Annual Basic Pay Increases	%	3.50%
Annual Inflation	%	3.00%

The related pension costs included in the *Consolidated Statements of Net Cost*, are as follows:

	<u>FY 2003</u>	<u>FY 2002</u>
Normal Cost	\$	\$ 4,250
Interest on the Unfunded Liability		18,380
Actuarial (Gains) Losses		6,400
Total Pension Cost	<u>\$</u>	<u>\$ 29,030</u>

NOAA Corps Post-Retirement Health Benefits Liability: This liability represents the unfunded actuarial present value of projected post-retirement plan benefits. The actuarial calculations used the same U.S. Department of Defense Retirement Board economic assumptions as used for the NOAA Corps Retirement System actuarial calculations. The claims costs used to derive the post-retirement liabilities were taken from the analysis of the U.S. Military's Projected Retiree Medical Liabilities report for FY 2003 and FY 2002.

The related post-retirement health benefits costs included in the *Consolidated Statements of Net Cost* are as follows:

	<u>FY 2003</u>	<u>FY 2002</u>
Normal Cost	\$	\$ 2,757
Interest on the Unfunded Liability		7,575
Actuarial (Gains) Losses		6,235
(Gains) Losses due to Changes in Medical Inflation		12,200
Total Post-Retirement Health Benefits Costs	<u>\$</u>	<u>\$ 28,767</u>

NOTE 13. Environmental and Disposal Liabilities

	<u>FY 2003</u>	<u>FY 2002</u>
Nuclear Reactor	\$	\$ 39,537
Pribiloff Island Cleanup		78,690
Other		2,962
Total	<u>\$</u>	<u>\$ 121,189</u>

NOTE 14. Leases*Capital Leases*

Assets under capital leases are as follows:

	<u>FY 2003</u>	<u>FY 2002</u>
Structure, Facilities, and Leasehold Improvements	\$	\$ 47,152
Equipment		19,801
Less: Accumulated Amortization		(29,816)
Net Assets Under Capital Leases	<u>\$</u>	<u>\$ 37,137</u>

Capital Lease Liabilities are primarily related to NIST and NOAA. In 1996, NIST entered into a capital lease for an office building in Gaithersburg, Maryland. NOAA has real property capital leases covering both land and buildings. The majority of leases are for buildings for weather forecasting offices, but they are also for radar system sites, river forecasting centers, and National Weather Service enforcement centers. NOAA's real property capital leases have an average life of __ years.

Capital Lease Liabilities

Future payments due under capital leases are as follows:

FY 2003			
Fiscal Year	PP&E Category		Total
	Real Property	Personal Property	
2004	\$	\$	\$
2005			
2006			
2007			
2008			
Thereafter			
Total Future Lease Payments			
Less: Imputed Interest			
Less: Executory Cost			
Net Capital Lease Liabilities	\$	\$	\$

FY 2002			
Fiscal Year	PP&E Category		Total
	Real Property	Personal Property	
2003	\$ 6,972	\$ 8,727	\$ 15,699
2004	6,473	3,150	9,623
2005	6,487	1,999	8,486
2006	3,782	1,996	5,778
2007	2,894	1,815	4,709
Thereafter	29,171	3,745	32,916
Total Future Lease Payments	55,779	21,432	77,211
Less: Imputed Interest	(24,701)	(537)	(25,238)
Less: Executory Cost	(6,557)	(12,751)	(19,308)
Net Capital Lease Liabilities	\$ 24,521	\$ 8,144	\$ 32,665

Operating Leases

Most of the Department's facilities are rented from the General Services Administration (GSA), which charges rent that is intended to approximate commercial rental rates. For Federal-owned property rented from GSA, the Department generally does not execute an agreement with GSA; the Department, however, is normally required to give 120 to 180 days notice to vacate. For non-Federal owned property rented from GSA, an occupancy agreement is generally executed, and the Department may normally cancel these agreements with 120 days notice.

The aggregate of (1) the Department's future payments due under noncancellable operating leases; and (2) the Department's estimated real property rent payments to GSA for FY 2004 through FY 2008 are as follows:

FY 2003				
Fiscal Year	PP&E Category			Total
	GSA Real Property	Non-GSA Real Property	Personal Property	
2004	\$	\$	\$	\$
2005				
2006				
2007				
2008				
Thereafter				
Total Future Lease Payments	\$	\$	\$	\$

NOTE 15. Liabilities Not Covered by Budgetary Resources

	<u>FY 2003</u>	<u>FY 2002</u>
Intragovernmental:		
Accrued FECA Liability	\$	\$ 33,087
Other		10,185
Total Intragovernmental		<u>43,272</u>
Accrued Payroll		21,447
Accrued Annual Leave		167,998
Actuarial FECA Liability and NOAA Corps Employee		
Retirement Benefits Liabilities		643,459
Environmental and Disposal Liabilities		115,299
Contingent Liabilities		2,000
Capital Lease Liabilities		27,947
Unearned Revenue		458,889
ITA Foreign Service Nationals' Voluntary Separation Pay		7,174
Other		<u>2,153</u>
Total	<u>\$</u>	<u>\$ 1,489,638</u>

Due to the unique funding structure of USPTO, the Unearned Revenue as of September 30 reported above is the portion of USPTO's unearned patent and trademark fees that are considered not covered by budgetary resources.

NOTE 16. Commitments and Contingencies

Commitments:

The Department has entered into long-term contracts for the purchase, construction, and modernization of environmental satellites and weather measuring and monitoring systems. A summary of major long-term commitments is shown below.

Major Long-Term Commitments (In Millions):

Description	FY 2003						Total
	FY 2004	FY 2005	FY 2006	FY 2007	FY 2008	Thereafter	
Geostationary Operational Environmental Satellites	\$	\$	\$	\$	\$	\$	\$
Polar Operational Environmental Satellites							
Other Weather Service							
Total	\$	\$	\$	\$	\$	\$	\$

Contingencies:

The Department is party in various administrative proceedings, legal actions, environmental suits, and claims brought against it. In the opinion of the Department's management and legal counsel, the ultimate resolution of these proceedings, actions, and claims will not materially affect the financial position or net costs of the Department.

The Department and other federal agencies are subject to liabilities for a variety of environmental cleanup costs, many of which are associated with the Second World War, at various sites within the U. S. The exact amount of these claims against the U.S. Government is unknown, but may exceed \$_____ million as of September 30, 2003. It is not possible to speculate as to a range of loss for these claims. In the absence of a settlement agreement, decree, or judgment, there is neither an allocation of response costs between the U.S. Government and other potentially responsible parties, nor is there an attribution of such costs to or among the federal agencies implicated in the litigation. Although the Department has been implicated as a responsible party, the U.S. Department of Justice was unable to provide an amount that is attributable to the Department.

The Department and other federal agencies are party to other suits, with claim amounts that may exceed \$_____ million as of September 30, 2003. In addition, there are other suits with no claim amounts. For all of these suits, it is reasonably possible that an adverse outcome will result. However, it is not possible to speculate as to a range of loss. Of these claims, most will be funded by Treasury's Judgment Fund, if any amounts are ultimately due.

The Department is subject to suits where adverse outcomes are probable and claims are approximately \$__ million and \$21 million as of September 30, 2003 and 2002, respectively. The range of loss for these suits is between \$_ million and \$__ million as of September 30, 2003, and between \$2 million and \$21 million as of September 30, 2002. Accordingly, \$_ million and \$2 million were accrued on the Consolidated Balance Sheets as of September 30, 2003 and 2002, respectively. For a majority of these cases, any settlements will be paid out of Treasury's Judgment Fund. Once the claims are settled or court judgments are assessed against the Department, the liability will be removed from the financial statements and an imputed financing source (representing the amount to be paid by Treasury's Judgment Fund) will be recognized.

During FY 2002, a multi-agency case was settled for \$115 million to be paid from Treasury's Judgment Fund. The Department was unable to obtain an allocation of the settlement amount; therefore, the amount is not included in these financial statements.

Guaranteed Loan Contingencies:

Fishing Vessels Obligation Guarantee Program: This loan guarantee program has outstanding non-acquired guaranteed loans (fully guaranteed by the Department) as of September 30, 2003 and 2002, with outstanding principal balances totaling \$_____ and \$68,737, respectively. A liability for loan guarantees of \$_____ and \$2,725 is recorded for the outstanding guarantees at September 30, 2003 and 2002, respectively.

Economic Development Revolving Fund: This loan guarantee and direct loan program has one outstanding non-acquired guaranteed loan (fully guaranteed by the Department) with an outstanding principal balance totaling \$____ and \$372 at September 30, 2003 and 2002, respectively. This loan guarantee has been terminated for noncompliance with the terms of the guarantee. The estimated range of liability for this guarantee is between \$__ and \$__ for September 30, 2003, and \$0 and \$372 for September 30, 2002, depending on the outcome of negotiations or court action or on the passage of time, until the statute of limitations runs out.

Emergency Steel Loan Guarantee Program: This program has ____ and one outstanding non-acquired guaranteed loan as of September 30, 2003 and 2002, respectively, with an outstanding principal balance of \$_____ and \$40,458 as of September 30, 2003 and 2002, respectively. The Department's guarantee percentages range from __ percent to __ percent on the loan guarantee outstanding as of September 30, 2003, and 85 percent to 95 percent on the loan guarantee outstanding as of September 30, 2002. Funds were borrowed from Treasury and will be repaid out of subsequent collections on loan collateral, and, if required, by funding from permanent indefinite appropriations authority authorized by the Federal Credit Reform Act. A liability for loan guarantees of \$_____ and \$18,813 is recorded for the outstanding guarantee at September 30, 2003 and 2002, respectively.

Emergency Oil and Gas Loan Guarantee Program: This program has ____ and three outstanding non-acquired guaranteed loans as of September 30, 2003 and 2002, respectively, with outstanding principal balances totaling \$_____ and \$2,392 as of September 30, 2003 and 2002, respectively. The Department's guarantee percentage is 85 percent for these guaranteed loans. A liability for loan guarantees of \$_____ and \$1,600 is recorded for the outstanding guarantees at September 30, 2003 and 2002, respectively.

NOTE 17. Net Position - Cumulative Results of Operations***Restatements to FY 2002 Financial Statements:***

In accordance with SFFAS No. 21, *Reporting Corrections of Errors and Changes in Accounting Principles*, the FY 2002 financial statements have been restated for errors discovered in FY 2003. In FY 2003, _____

_____. The following corrections are reflected in the restated FY 2002 financial statements:

NOTE 19. Combined Statement of Budgetary Resources

The amount of Appropriations Received on the *Combined Statements of Budgetary Resources* (SBR) reconciles to the amount reported on the *Consolidated Statements of Changes in Net Position*, as follows:

	FY 2003	FY 2002
Appropriations Received per the SBR	\$	\$ 5,813,215
Less:		
Appropriated receipts for USPTO, classified as exchange revenue		(282,300)
Other special receipts for NOAA, classified as exchange revenues		(18,916)
Donations		(928)
Total	\$	\$ 5,511,071

Borrowing authority available at September 30, 2003 is \$_____, which consists of \$_____ for NOAA's loan programs and \$_____ for ELGP. See Note 1M. *Debt to Treasury* for debt repayment requirements, financing sources for repayment, and other terms of borrowing authority used.

Approximately 90 percent of the Department's reporting entities have one or more permanent no-year appropriations to finance operations.

Rescissions to the Department's appropriation under Public Laws (P.L.) _____ and _____, amounted to \$_____ and \$_____, respectively.

Legal arrangements affecting the Department's use of Unobligated Balances of Budget Authority and/or Fund Balance with Treasury during FY 2003 include the following:

- Fund balance with Treasury includes restricted general funds of \$_____ permanently not available as of September 30, 2003, pursuant to P.L. _____ and \$_____ as of September 30, 2003 pursuant to P.L. _____.
- Credit reform regulations require all unobligated balances at year-end to be returned to Treasury. The restricted fund balance in NOAA's Liquidating Fund includes unobligated balances of \$_____ as of September 30, 2003. Fund balance with Treasury also includes restricted funds for unapportioned authority in NOAA's Coastal Zone Management Fund of \$_____ as of September 30, 2003.
- The Omnibus Budget Reconciliation Act of 1990 established revenue withholding on certain statutory patent fees collected by USPTO. Subsequent legislation extended the revenue withholding through the end of FY 1998. These withheld revenues were deposited into the Patent and Trademark Surcharge Fund, a restricted Special Fund Receipt Account at Treasury. USPTO may use monies from this account only as authorized by Congress and made available by the issuance of a Treasury warrant. At September 30, 2003, \$_____ is held in the Patent and Trademark Surcharge Fund.
- The USPTO was appropriated \$_____ for fees collected during FY 2003, and it collected an additional \$_____ that was not available for spending.

The Budget of the United States Government with actual numbers for FY 2003 has not yet been published. The expected published date is _____. A copy of the Budget can be obtained from the Office of Management and Budget Web site at <http://www.whitehouse.gov/omb>.

Apportionment Categories of Obligations Incurred

The amounts of direct and reimbursable obligations incurred against amounts apportioned under Categories A, B and Exempt from Apportionment are as follows:

FY 2003			
	Direct	Reimbursable	Total
Category A	\$	\$	\$
Category B			
Exempt from Apportionment			
Total	\$	\$	\$

FY 2002			
	Direct	Reimbursable	Total
Category A	\$ 2,183,881	\$ 1,988,282	\$ 4,172,163
Category B	3,895,855	189,570	4,085,425
Exempt from Apportionment	-	339,031	339,031
Total	\$ 6,079,736	\$ 2,516,883	\$ 8,596,619

NOTE 20. Consolidated Statement of Financing

The section Components Requiring or Generating Resources in Future Periods, shown on the *Consolidated Statements of Financing*, represents costs that are included in the Liabilities Not Covered by Budgetary Resources reported in Note 15. This section does not include costs incurred in prior fiscal years that are also included in Liabilities Not Covered by Budgetary Resources.

NOTE 21. Custodial Activity

NOAA receives interest, penalties, and fines primarily related to its past due Accounts Receivable, and is required to transfer the collections to Treasury. BIS receives civil monetary penalties from private entities that violate the Export Administration Act, and ITA is required to transfer certain trade fees to Treasury. For FY 2003, the Department had custodial revenue of \$____; of this amount, \$___ was payable to Treasury at September 30, 2003. For FY 2002, the Department had custodial revenue of \$8,330; of this amount, \$994 was payable to Treasury at September 30, 2002.

REQUIRED SUPPLEMENTARY INFORMATION

DEPARTMENT OF COMMERCE

UNITED STATES OF AMERICA

Required Supplementary Information (unaudited)

(In Thousands)

A Deferred Maintenance

Deferred maintenance is maintenance that was not performed when it should have been, that was scheduled and not performed, or that was delayed for a future period. Maintenance is the act of keeping property, plant, and equipment (PP&E) in acceptable operating condition and includes preventive maintenance, normal repairs, replacement of parts and structural components, and other activities needed to preserve the asset so that it can deliver acceptable performance and achieve its expected life. Maintenance excludes activities aimed at expanding the capacity of an asset or otherwise upgrading it to serve needs different from or significantly greater than those originally intended. The significant portions of Departmental deferred maintenance relate to the PP&E of both NOAA and NIST (see below for abbreviations). These two entities represent __ percent of the Department's PP&E balance.

National Oceanic and Atmospheric Administration (NOAA)

NOAA uses the Condition Assessment Survey (CAS) method to identify and quantify deferred maintenance for assets meeting NOAA's \$200 thousand capitalization threshold. CAS requires a periodic inspection of real property to determine its current condition and to estimate the cost likely to be incurred by the correction of any deficiencies.

The following indicates NOAA's deferred maintenance for projects with estimated costs greater than \$50 thousand, as of September 30, 2003:

PP&E Category	Number of Projects	Amount
Buildings and Structures		\$

While the CAS for the above facilities indicates that one or more of the building systems is in less than acceptable operating condition, NOAA has not established a facility condition code to classify the condition of individual facilities. The total deferred maintenance costs indicated could therefore vary by as much as 10 percent, or from \$____ million to \$____ million. There is an annual call each year to the NOAA elements requesting their submission of new projects and updates to existing unfunded projects to reflect changes in requirements or costs.

National Institute of Standards and Technology (NIST)

NIST also uses the CAS method to estimate deferred maintenance. NIST values the condition of assets using a five-point scale, with 1 representing excellent condition; 2, good condition; 3, acceptable condition; 4, poor condition; and 5, very poor condition. Assets that are assessed at 4 or 5 require repairs and maintenance to increase their value to 3, or acceptable condition. The following shows NIST's deferred maintenance as of September 30, 2003:

PP&E Category	Asset Condition	Estimated Cost to Return to Acceptable Condition
Mechanical and Electrical Devices		\$
Buildings (Internal Structures)		
Buildings (External Structures)		
Total		\$

B Segment Information

Departmental Management/Working Capital Fund (DM/WCF)

DM/WCF's mission is to provide, in the most efficient and economical manner possible, the centralized services required by the operating entities of the Department and other Federal entities. DM/WCF operates on a revolving fund basis, whereby current operating expenses charged to the customer finance the cost of goods and services. The overall financial goal of the fund is to remain at break-even position.

Services: DM/WCF provides a variety of administrative services to the Department and to other Federal entities. These include personnel-related services, financial and budget management, legal services, security, acquisition, telecommunications, and public affairs.

Major Customers: The major customers of DM/WCF are ____, ____, and ____, accounting for ____ percent, ____ percent, and ____ percent of revenues, respectively.

Note: Information about assets, liabilities, and net position as of September 30, 2003 can be found in the Consolidating Balance Sheet, which is included as supplementary information.

DM/WCF Summary of Costs and Related Exchange Revenues by Line of Business For the Year Ended September 30, 2003					
	Personnel-Related Services	Financial Management	Legal Services	Administrative Services	Total
Full Cost of Services Provided	\$	\$	\$	\$	\$
Less: Exchange Revenues					
Excess of Costs over Exchange Revenues	\$	\$	\$	\$	\$

Franchise Fund

The Department's Franchise Fund has three major goals:

- To operate along the lines of a commercial business by becoming self-sustaining and capable of achieving full cost recovery and by becoming competitive, without subsidies, in an open-market environment
- To encourage competition and the operation of market forces in the delivery of administrative services to lower costs and to promote better service
- To create a customer-oriented workforce that is capable of providing quality services and products

Services: The Franchise Fund is composed of only one service provider, the Office of Computer Services (OCS). OCS provides information technology services to the Department and to other Federal entities, including Treasury's Financial Management Service, the Department of Justice's Immigration and Naturalization Service, the U.S. Customs Service, the Equal Employment Opportunity Commission, the Pension Benefit Guaranty Corporation, and the Consumer Products Safety Commission.

Major Customers: The _____ is the major external customer for the Franchise Fund, accounting for ____ percent of revenue.

Franchise Fund Summary of Costs and Related Exchange Revenues by Line of Business For the Year Ended September 30, 2003	
	Computer Services
Full Cost of Services Provided	\$
Less: Exchange Revenues	
Excess of Costs over Exchange Revenues	\$

Note: Information about assets, liabilities, and net position as of September 30, 2003 can be found in the Consolidating Balance Sheet, which is included as supplementary information.

REQUIRED SUPPLEMENTARY STEWARDSHIP INFORMATION

DEPARTMENT OF COMMERCE

UNITED STATES OF AMERICA

Required Supplementary Stewardship Information (unaudited)

This section provides information on certain resources entrusted to the Department and certain stewardship responsibilities assumed by the Department. These resources and responsibilities are not required to be included in the assets and liabilities reported in the Department's financial statements; they are, however, important to understanding the operations and financial condition of the Department. This section also includes major investments made for the benefit of the U.S.

A Stewardship Property, Plant, and Equipment (PP&E)

Stewardship PP&E is an asset, the physical properties of which resemble those of the General PP&E that is traditionally capitalized in the financial statements of Federal entities. However, due to the nature of these assets, valuation would be difficult and matching costs with specific periods would not be meaningful.

Heritage Assets

Heritage assets are unique for their historical or natural significance; for their cultural, educational, or artistic importance; or for their significant architectural characteristics. The Department generally expects that these assets will be preserved indefinitely.

In cases where an asset has a heritage function and also a practical and predominant use for general government operations, the asset is considered a multi-use heritage asset. The costs of multi-use heritage assets are capitalized as General PP&E and are depreciated over the useful life of the asset.

National Oceanic and Atmospheric Administration (NOAA)

Collection-Type Assets: NOAA's collection-type heritage assets are comprised of approximately _____ items; primarily books, publications, manuscripts, records, and nautical chart plates. NOAA describes the condition of its heritage assets as being either "Acceptable" or "Non-Acceptable." "Acceptable" is defined as being suitable for public display. Using this criterion, the general condition of NOAA's heritage assets is acceptable.

Galveston Laboratory: Galveston Laboratory is comprised of seven buildings that were originally part of Fort Crockett, an Army coastal defense facility built shortly after 1900. These buildings are eligible for placement on the National Register. Due to their historic significance, exterior architectural features, and predominant use in government operations, the Galveston Laboratory is considered a multi-use heritage asset. This facility is undergoing a renovation in three phases. Phase II is complete, and Phase III is anticipated to begin in FY 2003 and continue into FY 2005. As of September 30, 2003, the renovations are ___ percent complete.

National Marine Fisheries Service (NMFS) Aquarium: In Woods Hole, Massachusetts, this aquarium is jointly used to educate the public, raise public awareness of NMFS activities, and accommodate the Northeast Fisheries Science Center, part of NOAA's mission. The aquarium houses ___ separate exhibition tanks holding more than ___ species of fish. The tanks range in size from ___ to _____ gallons. The general condition of the aquarium is good.

Stewardship Marine Sanctuaries

The National Marine Sanctuaries described below are composed primarily of protected water and underwater structures and do not meet the literal definition of stewardship land. They are nonetheless presented here because they have many of the characteristics of Stewardship PP&E.

National Marine Sanctuaries: In 1972, Congress passed the Marine Protection, Research, and Sanctuaries Act in response to a growing awareness of the intrinsic environmental and cultural value of our coastal waters. The Act authorized the Secretary of Commerce to designate discrete areas as National Marine Sanctuaries. These protected waters provide a secure habitat for species close to extinction and also protect historically significant shipwrecks and prehistoric artifacts. The sanctuaries are also used for recreational diving and sport fishing, and support valuable commercial industries such as fishing and kelp harvesting. As of September 30, 2003, ___ National Marine Sanctuaries have been designated, covering a total area of _____ square miles. The sanctuaries range from near-shore coral reefs to open ocean, and vary in size from less than one to more than _____ square miles. The sanctuaries are in excellent condition.

B Stewardship Investments

Stewardship investments are substantial investments made by the Federal Government for the benefit of the U.S. but are not physical assets owned by the Federal Government. Though treated as expenses when incurred to determine net cost of operations, these items merit special treatment so that users of Federal financial reports know the extent of investments that are made for long-term benefit.

Investments in Non-Federal Physical Property

Non-Federal Physical Property investments are expenses included in the Department's Net Cost of Operations for the purchase, construction, or major renovation of physical property owned by state and local governments. Based on a review of the Department's programs, NOAA and EDA have significant investments in non-Federal Physical Property.

NOAA

National Estuarine Research Reserves: The National Estuarine Research Reserve System consists of ___ estuarine reserves protected by Federal, state, and local partnerships. The network was created with the passage of the Coastal Zone Management Act of 1972, and, as of September 30, 2003, encompassed more than one million acres of estuarine waters, wetlands, and uplands. Most of the reserves are state-operated and managed in cooperation with NOAA. Investments in non-Federal Physical Property for FY 1999, FY 2000, FY 2001, FY 2002, and FY 2003 totaled \$6.7 million, \$11.5 million, \$29.1 million, \$27.5 million, and \$_____ million respectively.

Coastal Zone Management Fund: The Coastal Zone Management Fund is responsible for the incidental expenses of land acquisition and low-cost construction for the preservation or restoration of coastal resources and habitats; the redevelopment of deteriorating and urbanized waterfronts and ports, and the provision of public access to beaches and coastal areas. Investments in non-Federal physical property for FY 1999, FY 2000, FY 2001, FY 2002, and FY 2003 totaled \$2.9 million, \$2.8 million, \$5.3million, \$5.9 million, and \$___ million respectively.

Coastal and Estuarine Land Conservation Program: The Coastal and Estuarine Land Conservation Program was established under the Commerce, Justice, and State Appropriations Act of 2002 (Public Law 107-77), for the purpose of protecting important coastal and estuarine areas that have significant conservation, recreation, ecological, historical, or aesthetic values, or that are threatened by conversion from their natural or recreational state to other uses. Investments in the Coastal and Estuarine Land Program for FY 2003 totaled approximately \$___ million.

EDA

EDA provides grant funding to state and local governments for the construction and development of economic infrastructure and property that will create and retain jobs in economically distressed areas of the U.S. The funding is in the form of grants to state and local governments. No transfers of Federal properties take place under these programs. These grants are for the development of roads and infrastructure needed for new industrial parks, clean water and environmental projects, and the conversion of military facilities, closed by Congressional action, to civilian-based economic activity. EDA also awards grants for the repair of infrastructure and economic development related facilities damaged by floods and other disasters.

The investments in non-Federal physical property for the past five fiscal years were as follows:

(In Millions)

Program	FY 1999	FY 2000	FY 2001	FY 2002	FY 2003	Total
Public Works	\$180.9	\$173.5	\$174.9	\$182.5	\$	\$
Economic and Defense Adjustments	139.8	112.9	131.6	109.0		
Disasters Recovery	47.4	57.6	28.7	36.7		
Total	\$368.1	\$344.0	\$335.2	\$328.2	\$	\$

The above investments require matching funds by state and local governments of ___ to ___ percent.

Investments in Human Capital

Human capital investments are expenses, included in the Department's Net Cost of Operations, for education and training programs that are intended to increase or maintain national economic productive capacity and produce outputs and outcomes that provide evidence of the constant or increasing national productive capacity. These investments exclude education and training expenses for Federal civilian and military personnel. Based on a review of the Department's programs, the most significant dollar investments in Human Capital are by NOAA and EDA.

NOAA

National Sea Grant Program: This program is a partnership between the U.S.'s colleges and NOAA, and comprises ___ Sea Grant Colleges. The partnership was initiated in 1966 when Congress passed the National Sea Grant College Program Act, with the objective of making the U.S. the world leader in marine research and in the sustainable development of marine resources. The program funds research programs, and transfers new knowledge to coastal businesses, marine industries, the public, and governments. Research projects are funded on the basis of rigorous, highly-competitive peer reviews. The program has supported the work of approximately _____ graduate research assistants while they work on marine and Great Lakes science.

National Estuarine Research Reserve Program: This program supports activities designed to increase public awareness of estuary issues, to provide information to improve management decisions in estuarine areas, and to train graduate students in estuarine science.

National Research Council Research Associateship Program: The National Research Council, through its Associateship Programs office, awards outstanding scientists and engineers, at recent post-doctoral and experienced senior levels, with tenure as guest researchers at participating laboratories. The participants interact with NOAA scientists and learn new approaches, methods, and ideas, thereby increasing their capacities as scientific researchers. The participants provide the results of their research in scientific journals and through other means.

The following summarizes NOAA's investments in human capital for FY 1999 through FY 2003:

(In Millions)

Program	FY 1999	FY 2000	FY 2001	FY 2002	FY 2003	Total
National Sea Grant	\$14.6	\$14.5	\$15.2	\$18.2	\$	\$
National Estuarine Research Reserve Program	0.7	0.7	0.8	0.8		
National Research Council Research Associateship Program	1.8	1.7	3.0	0.4		
Total	\$17.1	\$16.9	\$19.0	\$19.4	\$	\$

Note: In addition to the human capital investments indicated above, the National Sea Grant Program received, on a pass-through basis from other Federal agencies, \$0.8 million, \$1.5 million, \$1.3 million, \$2.4 million, and \$___ million, for FY 1999, FY 2000, FY 2001, FY 2002, and FY 2003, respectively. Additionally, Sea Grant universities contributed matching funds to the National Sea Grant Program in the amounts of \$8.5 million, \$8.5 million, \$9.4 million, \$10.1 million, and \$___ million in FY 1999, FY 2000, FY 2001, FY 2002, and FY 2003, respectively.

EDA

EDA provides grant awards for training and technical assistance for economic development. The following summarizes EDA's investments in human capital for FY 1999 through FY 2003:

(In Millions)

Program	FY 1999	FY 2000	FY 2001	FY 2002	FY 2003	Total
Local Technical Assistance	\$9.1	\$11.0	\$9.6	\$9.3	\$	\$
Research Assistance and National Technical Assistance	0.5	0.6	0.4	0.5		
Total	\$9.6	\$11.6	\$10.0	\$9.8	\$	\$

Investments in Research and Development (R&D)

R&D Investments are expenses, included in the Department's Net Cost of Operations, that support the search for new or refined knowledge and ideas, and facilitate the application or use of such knowledge and ideas for the development of new or improved products and processes. The investments are made with the expectation of maintaining or increasing national economic productive capacity, or yielding other future economic and societal benefits. Based on a review of the Department's programs, the only significant investments in R&D are by NIST and NOAA.

National Institute of Standards and Technology (NIST)

NIST Laboratories Program: The NIST Laboratories have been the stewards of the U.S.'s measurement infrastructure since their inception in 1901 as the National Bureau of Standards. In fulfilling the Constitutional responsibility to fix the standards of weights and measures, these laboratories provide measurement methods, reference materials, test procedures, instrument calibrations, fundamental data, and standards that comprise essential tools for research, production, and buyer-seller transactions. The laboratories focus their work in three main areas: 1) advancing measurement science; 2) supplying infrastructure tools for technological innovation, economic efficiency and other public benefits; and 3) providing standards solutions for new technologies and for trade.

Advanced Technology Program (ATP): ATP is a collaborative effort with industry to identify and promote investment in technologies with significant potential for broad-based economic benefits but inadequate levels of private investment. Cost-shared research is funded through an annual competitive awards process. Awards are made only after rigorous examination of the technical and business merits of each proposal and of the potential benefits to the U.S. economy and quality of life. In FY 2003, the program selected __ new industrial research projects to receive cost-shared support totaling \$__ million in Federal and industry funds (if carried to completion). The awards target a broad array of technologies, including pharmaceutical design, tissue engineering, industrial catalysts, energy generation and storage, manufacturing technologies, electronics manufacturing, computer software, and electro-optics. _____ of the awards were made to small businesses, and at least __ universities are involved as joint venture partners or subcontractors.

The following summarizes NIST's R&D investments for FY 1999 through FY 2003:

(In Millions)

	Measurement and Standards Laboratories					Advanced Technology Program					Totals				
	FY 1999	FY 2000	FY 2001	FY 2002	FY 2003	FY 1999	FY 2000	FY 2001	FY 2002	FY 2003	FY 1999	FY 2000	FY 2001	FY 2002	FY 2003
Basic Research	\$ 49.5	\$ 48.6	\$ 62.5	\$ 63.5	\$	\$ 0.0	\$ 0.0	\$ 0.0	\$ 0.0	\$	\$ 49.5	\$ 48.6	\$ 62.5	\$ 63.5	\$

NOAA

NOAA conducts a substantial program of environmental research and development in support of its mission, much of which is performed to improve the U.S.'s understanding of and ability to predict environmental phenomena. The scope of research includes:

- Improving predictions and warnings associated with the weather, on time scales ranging from minutes to weeks.
- Improving predictions of climate, on time scales ranging from months to centuries.
- Improving understanding of natural relationships to better predict and manage renewable marine resources and coastal and ocean ecosystems.

NOAA also conducts research that is intended to provide a solid scientific basis for environmental policymaking in government. Examples of this research include determining the stratospheric ozone-depleting potential of proposed substitutes for chlorofluorocarbons (CFCs), and identifying the causes of the episodic high rural ozone levels that significantly damage crops and forests.

NOAA conducts most R&D in-house; however, contractors to NOAA undertake most systems R&D. External R&D work supported by NOAA includes that undertaken through the National Sea Grant Program, the Cooperative Institutions of the Environmental Research Laboratories, the Climate and Global Change Program, and the Coastal Ocean Program.

Environmental and Climate: NOAA's Office of Ocean and Atmospheric Research conducts research in five major areas: interannual and seasonal climate, global change, weather, the marine environment, and the undersea.

Fisheries: R&D consists mainly of the collection and analysis of information on the status of fishery resources and protected species, and other work related to programs that develop fisheries for economic growth.

Weather Service: NOAA is funding the development of a new weather service system, the Advance Weather Interactive Processing System (AWIPS), for the modernization of its weather service.

Fleet Maintenance and Aircraft Services: These expenditures support NOAA's R&D effort.

The following summarizes NOAA's R&D investments for FY 1999 through FY 2003:

(In Millions)

Program	FY 1999	FY 2000	FY 2001	FY 2002	FY 2003	Total
Environmental and Climate	\$253.5	\$257.4	\$266.2	\$289.9	\$	\$
Fisheries	223.0	241.3	125.8	121.7		
Fleet Maintenance and Aircraft Services	14.4	14.7	18.0	19.3		
Weather Service	6.3	7.7	11.1	11.0		
Other	53.6	65.9	112.9	132.4		
Total	\$550.8	\$587.0	\$534.0	\$574.3	\$	\$

GLOSSARY OF ACRONYMS

DEPARTMENT OF COMMERCE

UNITED STATES OF AMERICA

ABBREVIATION	TITLE
A	
APP	Annual Performance Plan
ASAP	Automated Standard Application for Payment
ATP	Advanced Technology Program
AWIPS	Advanced Weather Interactive Processing System
B	
BEA	Bureau of Economic Analysis
BEC	Bose-Einstein Condensate
BFC	Budget Functional Classification
BIS	Bureau of Industry and Security
BLS	Bureau of Labor and Statistics
BRS	Business Reporting System
C	
CAMS	Commerce Administrative Management System
CAS	Condition Assessment Survey
CEAR	Certificate of Excellence in Accountability
CEIP	Coastal Energy Impact Program
Census	Bureau of the Census
CFO	Chief Financial Officer
CFS	Core Financial System
CIAO	Critical Infrastructure Assurance Office
CIRT	Computer Incident Response Team
CIO	Chief Information Officer
CMS	Client Management System
COMMITTS	Commerce Information Technology Solutions
CSRS	Civil Service Retirement System
CPC	Climate Prediction Center
CPI	Consumer Price Index
CWPPRA	Coastal Wellness Planning Protection and Restoration Act
D	
DM	Departmental Management
DNS	Domain Name System
DPA	Defense Production Act
DPAS	Defense Priorities and Allocations System

E	EAA	Export Administration Act
	EAR	Export Administration Regulations
	ECASS	Export Control Automated Support System
	EDA	Economic Development Administration
	EFS	Electronic Filing System
	EFT	Electronic Funds Transfer
	ELGP	Emergency Oil and Gas and Steel Loan Guarantee Programs
	ESA	Economics and Statistics Administration
F	FACTS	Federal Agencies Centralized Trial Balance System
	FAIR	Federal Activities Inventory Reform
	FASAB	Federal Accounting Standards Advisory Board
	FCC	Federal Communications Commission
	FCRA	Federal Credit Reform Act
	FECA	Federal Employees Compensation Act
	FEGLI	Federal Employees Group Life Insurance Program
	FEHB	Federal Employees Health Benefit Program
	FERS	Federal Employees Retirement System
	FICA	Federal Insurance Contributions Act
	FFMIA	Federal Financial Management Improvement Act of 1996
	FMFIA	Federal Managers' Financial Integrity Act of 1982
	FVOG	Fishing Vessel Obligation Guarantee Program
	FWC	Future Workers Compensation
	FY	Fiscal Year
G	G&B	Gifts and Bequests Fund (part of Departmental Management)
	GAO	General Accounting Office
	GAAP	Generally Accepted Accounting Principles
	GDP	Gross Domestic Product
	GISRA	Government Information Security Reform Act
	GPS	Global Positioning System
	GMF	Government Master File
	GOES	Geostationary Operational Environmental Satellite
	GPRA	Government Performance and Results Act of 1993
	GSA	General Services Administration

I	ICP	Internal Control Program
	IFQ	Individual Fishing Quota Loans
	IP	Internet Protocol
	IT	Information Technology
	ITA	International Trade Administration
	ITS	Institute for Telecommunications Sciences
M	MAP	Measurement Assurance Program
	MBDA	Minority Business Development Agency
	MEP	Manufacturing Extension Partnership
	MFI	Market Facts Incorporated
	MSA	Metropolitan Statistical Area
N	NAF	National Academy Foundation
	NAFTA	North American Free Trade Agreement
	NCDC	National Climate Data Center
	NHC	National Hurricane Center
	NIST	National Institute of Standards and Technology
	NMFS	National Marine Fisheries Service
	NOAA	National Oceanic and Atmospheric Administration
